

**DRAFT**

# The Title of Your PhD Dissertation

**Karan Dsilva**

Supervisors:

Prof. Dr. Hugues Sana  
(KU Leuven, Belgium)

Dr. Tomer Shenar  
(University of Amsterdam, Netherlands)

Dissertation presented in partial  
fulfillment of the requirements for the  
degree of Doctor of Science (PhD):  
Astronomy and Astrophysics

July 2022

# The Title of Your PhD Dissertation

**Karan Dsilva**

## **Supervisors:**

Prof. Dr. Hugues Sana  
(KU Leuven, Belgium)

Dr. Tomer Shenar  
(University of Amsterdam, Netherlands)

## **Examination committee:**

Prof. Dr. Mieke De Cock, chair  
(KU Leuven, Belgium)

Prof. Dr. Nicole St. Louis  
(University of Montreal, Canada)

Dissertation presented in partial fulfillment of the requirements for the degree of Doctor of Science (PhD): Astronomy and Astrophysics

July 2022

**Cover design credit:** Fabian Bodensteiner

**Acknowledgements:** This research has been funded by the Fonds voor Wetenschappelijk Onderzoek Vlaanderen (FWO) under contract G075916N and under grant number V434818N. This work is based on observations carried out with the Flemish Mercator Telescope at the Spanish Observatorio del Roque de los Muchachos (ORM, La Palma, Spain), and the 1.54 m Danish telescope and the Swiss 1.2 m telescope at the European Southern Observatory (ESO, La Silla, Chile). This work has made use of data from the European Space Agency (ESA) mission *Gaia*, processed by the Gaia Data Processing and Analysis Consortium (DPAC), and funding for the DPAC has been provided by national institutions, in particular the institutions participating in the Gaia Multilateral Agreement. This research has also made use of the SIMBAD database, operated at CDS, Strasbourg, France.

# Preface

Nice story about the problems understanding the orbits of post interaction binaries...

Before we can present the work we have done towards a better understanding of this problem, several concepts need to be introduced.
